<p>Executive Branch Action: The Establishing And Implementing The President's "Department Of Government Efficiency" Executive Order (DOGE EO) does not establish a new cabinet-level department (which the President does not have the authority to do). Instead, the DOGE EO renamed the United States Digital Service, which had been launched in 2014 by the Obama Administration to improve the federal government's digital capabilities following rollout of HealthCare.gov. DOGE, which is under the leadership of Elon Musk, reports directly to the Executive Office of the President and the EO directs the entity to modernize technology and software across the federal government.</p>
