

THE AMERICAN GERIATRICS SOCIETY

PROJECTED FUTURE NEED FOR GERIATRICIANS

The American Geriatrics Society's Geriatrics Workforce Policy Studies Center (GWPS) has compiled the following data on our nation's projected geriatrician shortfall. It's projected that approximately 30% of the 65 plus patient population will need to be cared for by a geriatrician and that each geriatrician can care for a patient panel of 700 older adults.¹ Based on these numbers, approximately:

30,000 geriatricians will be needed by 2030 to care for about 21 million older Americans.

Given that there were 7,428 certified geriatricians in 2014², this would conservatively, require training approximately 1,500 geriatricians per year over the next 15 years to meet the targeted need for 30,000 geriatricians by 2030.

State	Projected Population 65+ in 2030 ³	30% is Most Vulnerable	Projected # of Geriatricians Needed in 2030 ⁴	Certified Geriatricians (2014) ⁵	# of Geriatricians we Need to Train Between Now and 2030
